V101-210-008 Receiving unit | HF | TCP/IP | Plug-and-socket power supply unit

Description

The receiving unit works together with a reading unit and transponders. The reading unit (LF) generates a spherical electromagnetic detection field. This "wakes up" sleeping transponders from their stand-by mode as soon as they are brought into the field. At the same time, the reading unit transmits its identification number (LF-ID) to the transponder. The transponder in the field sends its own identification number (Tag-ID) as well as the received LF-ID to the receiving unit (HF). The received data is processed and sent from the receiving unit via potential-free contacts to the in-house nurse call system or mobile PPE/DECT systems. HF dependencies can be realised by external devices (reed contacts, etc.). Including TCP/IP for network solution SCC5.0.

Data table

Dimensions PCB HF (WxHxD)	80 x 100 x 19 mm
Power supply	10-36 V (DC)
Current consumption at 12V DC	100 mA (with X-port connected up to 200 mA)
Current consumption at 24V DC	50 mA (with X-port connected up to 100 mA)
Frequency	868 MHz communication frequency
Weight	63 g
Connections	3 x relay
	RF module slot (RFM 22/23)
	2 x optocoupler inputs, X3.10, X3.11
Dimensions TCP/IP (X-Port) (WxHxD)	33.9mm x 14.5mm x 18.3mm
Weight TCP/IP plug-on board	14 g
Operating temperature	-40°C to +85°C normal mode / -40 to +75°C high performance mode
Power supply	3.3V
Ser. Speed	921,600 baud
Housing dimensions (WxHxD)	230 x 143 x 34.5 mm
Total weight	459 g
Degree of protection	IP 42 - not suitable for outdoor installation
Housing colour	RAL 9010 white (OEM version); RAL 7016 anthracite
Material	ABS PA 765
Cable inlets	Several predetermined breaking points for cable inlets available

X1.1	+ 10-36V	X2.1	K3 Schließer
